INSTALLATION INSTRUCTION – INSTRUCCIONES DE INSTALACION
MULTI POINT CONSTRUCTION HANDLE SET

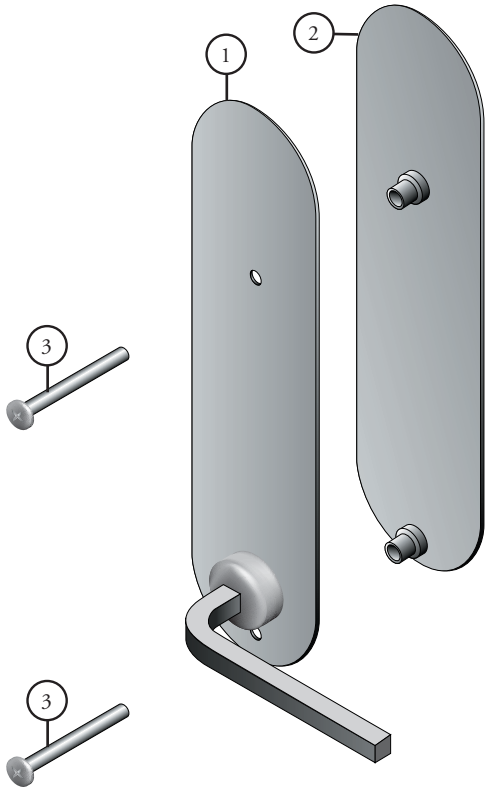

TOOLS REQUIRED:

- Phillips screwdrivers

Check contents and identify all parts before proceeding:

PART IDENTIFICATION

1 Interior Escutcheon - with handle
2 Exterior Escutcheon
3 10-32 Mounting Screws (2)

1 INSTALL THE CONSTRUCTION HANDLE

A. Insert the construction handle rod into the actuator hub of the door hardware.

B. Rotate the handle lever down to release the latch bolts and open the door.

C. Open the door.

D. Place the construction escutcheon plate on the exterior door stile.

E. Insert a 10-32 mounting screw into each of hole of the interior escutcheon plate.

F. Using a Phillips screw driver, hand tighten the mounting screws.

2 CHECK THE OPERATION

A. Close the door. The door latches will engage the strikes when the door is closed. If the latches do not engage the strikes, check the alignment of the locks with the strikes. If they do not align, make sure the door is installed square in the opening.

B. Rotate the handle down to unlatch and open the door.
