1 Performance Upgrade Interlocker Installation (continued):

B. **From the exterior, position the Performance Upgrade Interlocker on the interlocker as shown.** The leg protruding from one side goes toward the exterior and then placed up against the fixed panel.

The top of the Performance Upgrade Interlocker should nest against the top of the frame head, no more than 1/4" away.

Push the Performance Upgrade Interlocker tightly against the panel along the entire length, top to bottom to wet out the adhesive tape.

C. **Take the #10 x 2.5" Phillps Pan Head screws and install screws into each available hole.**

Note: Screws have self-drilling tips so no need to pilot into panel.
