## Contemporary Interior Finish or Trim Options

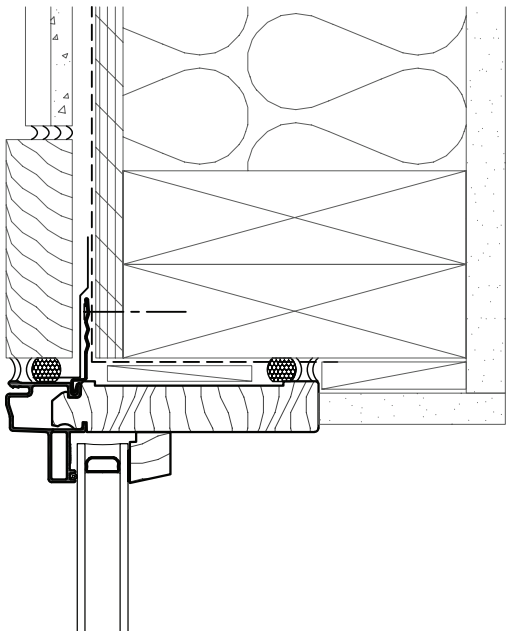

The purpose of this Technote is to illustrate a variety of interior trim options for Pella window frames. These details vary from the relatively common to the unconventional. Warning labels have been added to the unconventional details due to restrictions on reglazing or window operation they may create. The gypsum board returns are shown for illustration purposes and alternate interior finish materials can be substituted at the design professional's discretion. The design principles illustrated here for windows can also be applied to doors.

- **Gypsum board wrap outside window frame**

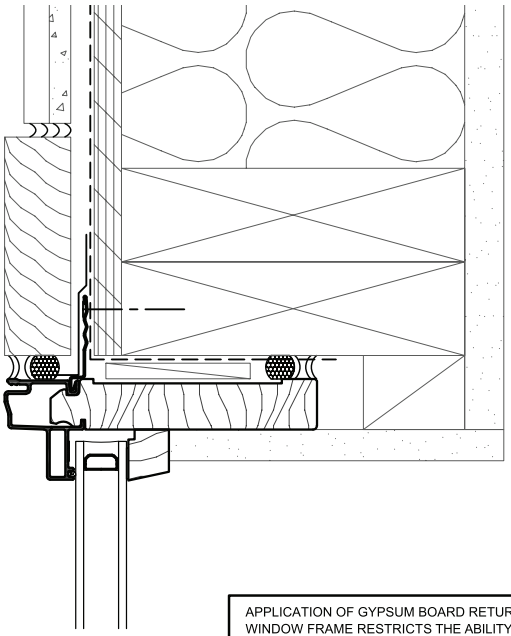

- **Gypsum board wrap into window frame**

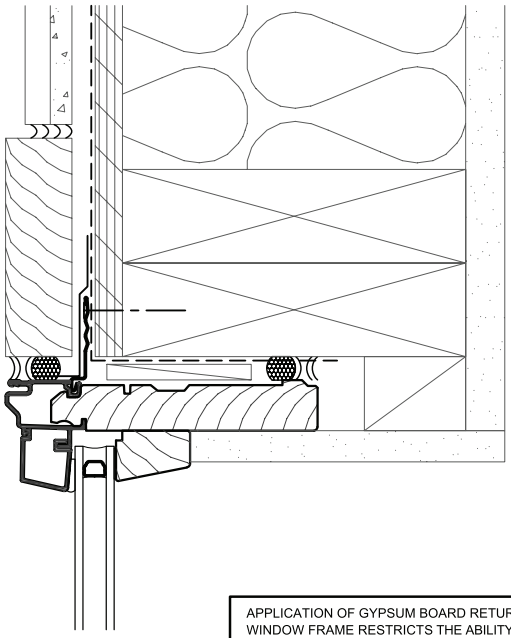

# TECHNOTES

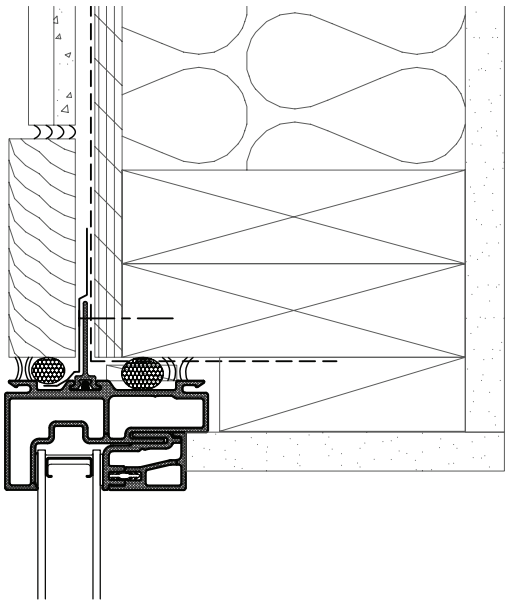

- **Gypsum board wrap over window frame** (Top right unit is reglazable from the exterior)

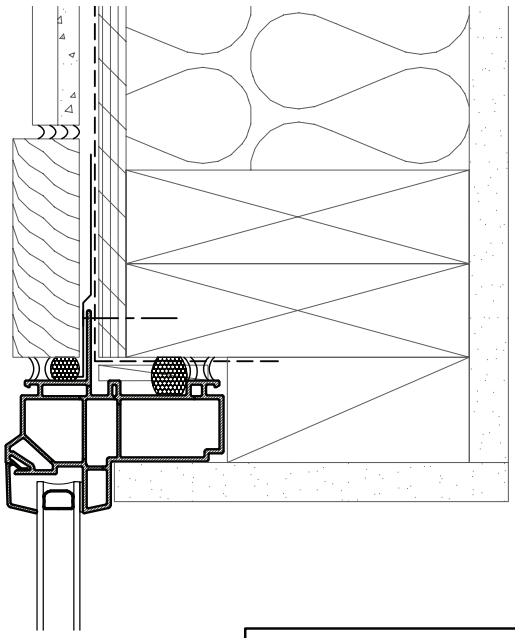

APPLICATION OF GYPSUM BOARD RETURN OVER WINDOW FRAME RESTRICTS THE ABILITY TO SERVICE UNIT OR INSPECT INSTALLATION FROM THE INTERIOR AND WOULD REQUIRE REMOVAL TO GAIN FULL ACCESS IF REQUIRED.

APPLICATION OF GYPSUM BOARD RETURN OVER WINDOW FRAME RESTRICTS THE ABILITY TO SERVICE UNIT OR INSPECT INSTALLATION FROM THE INTERIOR AND WOULD REQUIRE REMOVAL TO GAIN FULL ACCESS IF REQUIRED.

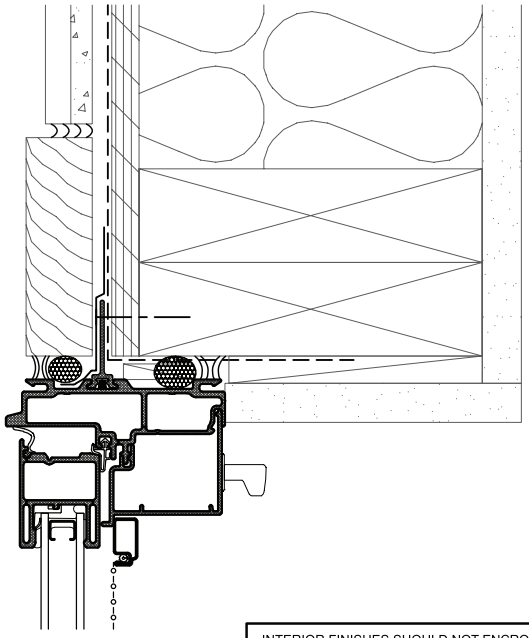

APPLICATION OF GYPSUM BOARD RETURN OVER WINDOW FRAME RESTRICTS THE ABILITY TO SERVICE UNIT OR INSPECT INSTALLATION FROM THE INTERIOR AND WOULD REQUIRE REMOVAL TO GAIN FULL ACCESS IF REQUIRED.

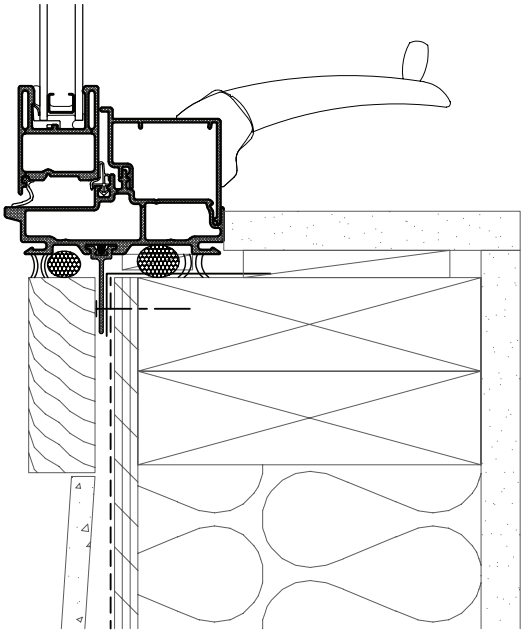

APPLICATION OF GYPSUM BOARD RETURN OVER WINDOW FRAME RESTRICTS THE ABILITY TO SERVICE UNIT OR INSPECT INSTALLATION FROM THE INTERIOR AND WOULD REQUIRE REMOVAL TO GAIN FULL ACCESS IF REQUIRED.

- Gypsum board wrap into operable window frame

INTERIOR FINISHES SHOULD NOT ENCROACH ON HARDWARE, RESTRICT ITS ABILITY TO OPERATE, OR MAKE OPERATION OF THE WINDOW OR DOOR UNCOMFORTABLE

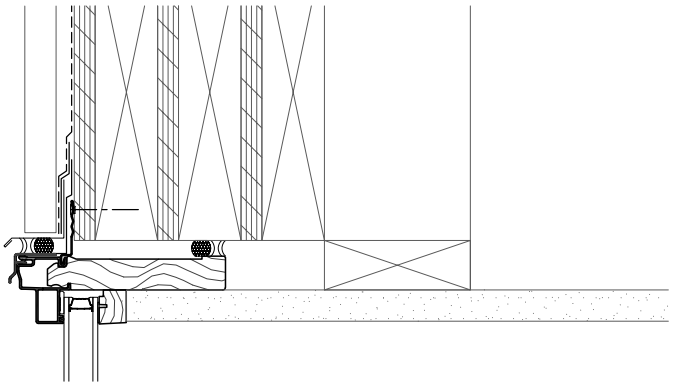

## Interior finish wrapping over window frame project example

The following images and installation details are from a Pella project where the interior finishes are wrapped over the frame on the interior of Pella aluminum clad wood Fixed Frame Direct Set window units. Consideration for the use of Pella Architectural Support (PAS) services is recommended to address issues associated with performance and the serviceability of product for such non-conventional methods of installation.
