Sliding Patio Door Threshold Cover Replacement

SERVICE INSTRUCTION

03/2026-Current

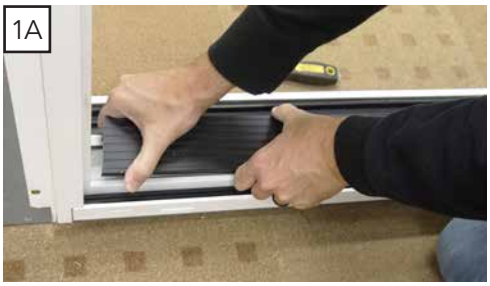

Tools Required:

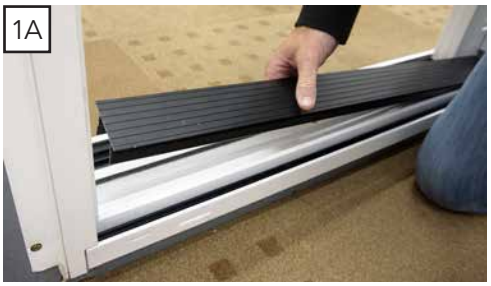

- Stiff putty knife, pry bar, hook tool or flat blade screwdriver

1 Threshold Cover Replacement:

A. **From the interior,** use a stiff putty knife, straight blade screwdriver or pry bar to lift the barbed leg of the cover over where it catches to help remove it from the sill. Remove the threshold cover.

B. **Install the threshold cover.** Insert the angled end of the threshold cover end into jamb side of the frame into the exterior sill track and press down into place.
