Hardware Parameters and Recommendations

Pella Reserve Commercial Out-Swing Doors are not supplied with locking hardware, closers, panic hardware, push plates or kick plates. Use the following guidelines when selecting these hardware items from your hardware supplier.

Mortise Locks: Maximum mortise rout dimensions are shown below for commercial doors with standard stile dimensions. Maximum height of the mortise rout is 10 inches. Routs should be sealed before the locks are installed for added moisture protection.

Cylinder Locks: Maximum diameter of cylinder lock bore is 2-1/8". Minimum backset is 2-3/8"; maximum backset is 2-3/4".

Door Closers: When door closers are being used, Pella recommends the use of surface applied door closers with mounting devices that anchor into the structural header of the rough opening. Devices that anchor to the door frame only are not approved for use on Pella doors. Concealed closers that are routed into the top of the door panel are not recommended.

Exit Devices: When exit devices are used, Pella recommends the use of surface mounted vertical rod hardware. Concealed vertical rod hardware is not recommended.

Kick plates and push plates: In commercial applications, Pella recommends the use of kick plates and push plates to protect the wood veneer.
