## Introduction

This section explores accessories, assembly systems and field measurement procedures required to meet the specific challenges of renovation and window replacement within existing construction.

**Vinyl Windows and Doors Manufactured by Pella are designed for three different replacement methods:**

**Pocket Replacement System** - is a fully assembled window that slides easily into the existing wood double-hung sash "pocket" created when the old sash is removed. This is done without damaging surrounding trim, wall paper, paint or plaster. Custom-built units are made to order in 1/4" increments to fit your existing window opening.

**Flush Flange System** - is designed for replacing existing aluminum or steel frame windows and patio doors in typical California hard coat stucco exterior applications, without removing the existing frame. Existing window frame and weep system must remain in place. For patio doors, the existing door frame head and jambs must remain in place, however the existing door sill must be removed. Custom-built units are made to order in 1/4" increments to fit your existing opening.

**Full Frame Replacement** - requires the complete removal of the existing window or patio door.

Encompass by Pella® vinyl window products are intended only for use less than 40 feet above ground level.

**VINYL WINDOW SLOPED SILL ADAPTER**

Sloped sill adapter is attached to the sill of the window.

**PELLA SMARTFLASH™ INSTALLATION TAPE**

Flashing tape is applied at the sill.

SEALANT BY OTHERS.

**LOW EXPANSION, LOW PRESSURE POLYURETHANE INSULATING WINDOW AND DOOR FOAM SEALANT - (DO NOT USE HIGH PRESSURE OR LATEX FOAMS).**

Apply a continuous 1" bead of insulating foam to provide a full interior seal.

Scale 3" = 1' 0"

Items in bold are available from Pella.

These details are typical single punch openings.

Refer to the appropriate Vinyl windows and Doors Manufactured by Pella installation instruction for step by step instructions.

Single-Hung Pocket Replacement Installation Details

**VINYL WINDOW SLOPED SILL ADAPTER**

Sloped sill adapter is attached to the sill of the window.

**PELLA SMARTFLASH™ INSTALLATION TAPE**

Flashing tape is applied at the sill.

SEALANT BY OTHERS.

**LOW EXPANSION, LOW PRESSURE POLYURETHANE INSULATING WINDOW AND DOOR FOAM SEALANT - (DO NOT USE HIGH PRESSURE OR LATEX FOAMS).**

Apply a continuous 1" bead of insulating foam to provide a full interior seal.

Scale 3" = 1' 0"

Items in bold are available from Pella.

These details are typical single punch openings.
